Art Unit: 3709

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

-- Group I, claim(s) 1, drawn to a vascular prosthesis patch.

-- Group II, claim(s) 2-10, drawn to a method for improving the e-modulus of a patch.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The inventions are independent or distinct, each from the other because: They do not share unity of invention in the form of a special technical feature, as claim 1 is directed to a device that is anticipated by the prior art, Lentz 6,428,571, that discloses the device as claimed, a vascular graft made of a biocompatible polymer, column 1, line 10 - line 32, column 2, line 65 - column 3, line 12, column 4, line 34 - line 45, column 5, line 11 - line 55.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

No telephone call could be made, as the inventor does not reside within the United States.
